

Crossing the Threshold into Adulthood

A Walk through the Seasons for High School Juniors and Seniors

Join us for three wilderness walks, one in Autumn, Winter and Spring and culminate in a rich Summer overnight. As we immerse ourselves in the changing seasons of our wild local landscape, we will reflect on the changing seasons of our own inner landscape during this time of transition from youth to adulthood. This is an opportunity for High School Juniors and Seniors to have fun and connect in unique way that honors each participants experience as he or she steps towards a new phase of life. A contemporary version of the medicine wheel will inspire and guide our introspection and help us gain insight into the cycles of our lives. We will co-create our intentions, explore and wander by the light of our own inner knowing. From solo journeys to sharing our stories this offering will be a meaningful opportunity to connect with ourselves, each other and the beautiful land on which we live.
